

## Settings for medh server .

For ubuntu/linux based OS

1. Go to network--> select settings.

2.click on settings of the connected network.

3. Go to the IP v4 tab.

Cancel **Wired** Apply

Details Identity **IPv4** IPv6 Security

**IPv4 Method**  Automatic (DHCP)  Link-Local Only  
 Manual  Disable

**DNS** Automatic  ON

Separate IP addresses with commas

**Routes** Automatic  ON

Address	Netmask	Gateway	Metric

Use this connection only for resources on its network

4. set the DNS automatic tab to OFF and enter the DNS server as 172.30.4.14, 8.8.8.8

Cancel **Wired** Apply

Details Identity **IPv4** IPv6 Security

**IPv4 Method**  Automatic (DHCP)  Link-Local Only  
 Manual  Disable

**DNS** Automatic  OFF

172.30.4.14,8.8.8.8

Separate IP addresses with commas

**Routes** Automatic  ON

Address	Netmask	Gateway	Metric

Use this connection only for resources on its network

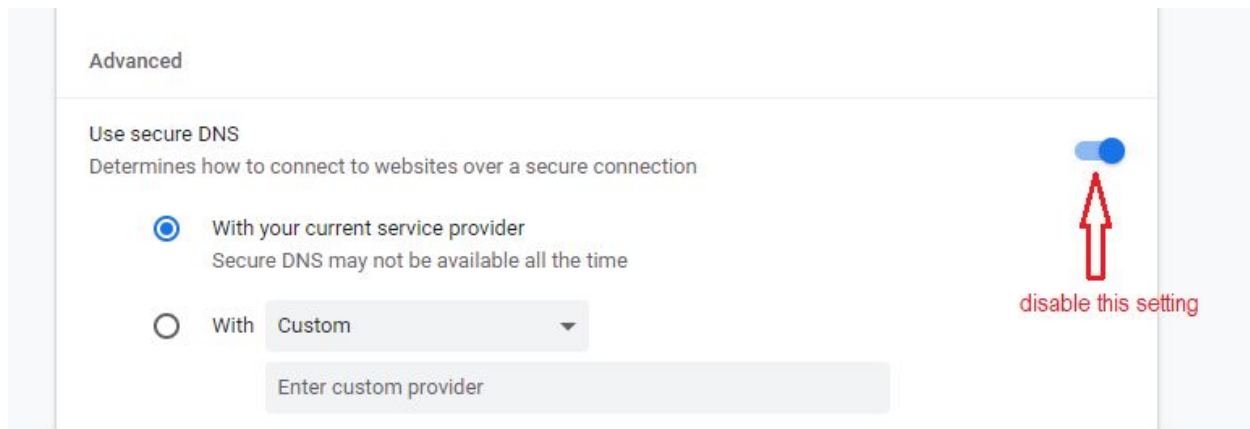

5. After entering the DNS IPs,click on Apply.
6. Disable the connected network one time and then reconnect it.
7. Then open the link  
<http://medh2.iitrpr.ac.in>

### For windows systems:

In windows, by default the site will work in firefox. In case if it does not work please check the ip configuration of the system. It should be set on Automatic.

In google chrome, in some cases the site will not open, if that happens please follow the below steps.

1. Open the chrome browser.
2. Go to settings→ privacy and security settings-->security  
Or copy paste this to new tab  
`chrome://settings/security`
3. In the security setting go to the secure dns option and disable it.

4. After that reload the medh link and it will work.
